ECB-300 Series

BACnet B-AAC 18-Point Programmable Controllers

Overview

The ECB-300 Series controllers are microprocessor-based programmable controllers designed to control equipment such as air handling units, chillers, boilers, pumps, and cooling towers.

The ECB-300 can also be used for lighting control and power measurement applications. This controller uses the BACnet[®] MS/TP LAN communication protocol and is BTL[®]-Listed as BACnet Advanced Application Controllers (B-AAC).

Features & Benefits

- Flexible inputs and outputs support all industry-standard HVAC unitary applications
- Rugged hardware inputs and outputs eliminate the need for external protection equipment
- An optional full-color backlit display with jog dial provides direct access to a wide range of controller functions
- Supports EC-gfxProgram, making Building Automation System programming effortless
- Open-to-Wireless™ ready, supporting a wide variety of wireless sensors and switches and helping to reduce installation costs
- Supports the Allure[™] Series Communicating Sensors, providing intelligent sensing and environmental zone control

Model Selection

Example: ECB-350

Series	Model	Options		
ECB-	300: 18 Points, 15 Vdc Power Supply, 10 UI, 8 UO	<i>UUKL</i> : UL 864, 10 th Edition UUKL and California State Fire Marshal Listed 1		
	350: 18 Points, 15 Vdc Power Supply, 10 UI, 8 UO, Color display			

The UL 864 UUKL Listed Smoke Control Equipment is used only in Distech Controls' UUKL smoke control system. For detailed specifications, requirements and procedures for installing and operating UUKL Listed equipment refer to the Distech Controls' UUKL Smoke Control documentation

Recommended Applications

Model	ECB-300 / 350	ECB-300 UUKL
Air Handling Unit		
Chiller		
Boiler		
Cooling Tower		
Pumps		
Exhaust Fan

Product Specifications

Power Supply Input

Voltage Range 24VAC/DC; ±15%; Class 2

Frequency Range 50/60Hz

Overcurrent Protection Field replaceable fuse

Fuse Type 3.0A

Power Consumption ECB-300 16 VA typical plus all external

loads¹, 38 VA max.

Power Consumption ECB-350 19 VA typical plus all external

loads¹, 41 VA max.

External loads must include the power consumption of any connected modules such as an Allure Series Communicating Sensor. Refer to the respective module's datasheet for related power consumption information.

Communications

Communication Bus BACnet MS/TP

BACnet Profile B-AAC

EOL Resistor Built-in, jumper selectable

Baud Rates 9600, 19 200, 38 400, or 76 800

Addressing Dip switch or with an Allure EC-

Smart-Vue Series

Communicating Sensor
